Igor Shevelev

+995 597751369 | redmarsigor@gmail.com

Background

Proficient in both front-end and back-end development, with hands-on experience and coursework from the University of British Columbia, I have cultivated a versatile skill set. Mastering over five programming languages, including C and JavaScript, I consistently excel in dynamic environments where innovation and problem-solving are paramount.

Throughout my career, I have successfully navigated diverse learning methods, from reading technical manuals to leveraging tools like ChatGPT, which has enabled me to tackle new challenges efficiently. My ability to communicate complex ideas clearly and collaborate across teams has been integral to my success in delivering high-quality results.

Education

Moscow Institute of Physics and Technology (MIPT)   *2017-2019*

Professional Certifications

International Programming School «42»

- Successfully passed a highly selective admission process, where over 80% of participants were eliminated.
- Completed an innovative project-based curriculum focused on a peer-to-peer learning model, which fostered strong self-teaching abilities and adaptability to new challenges.
- Ranked in the top 1% of students, demonstrating a high level of dedication and passion for learning.
- Built a solid foundation in back-end development through hands-on experience with C, C++, and Java, focusing on efficient data management, server-side logic, and performance optimization.

Other Certifications

Programming courses

- CS 50 Harvard, online courses, Certificate of completion
- JavaRush, online courses, Certificate of completion
